Upon hearing the first sentence you notice a distinctive voice: Rich, powerful yet soulful at the same time.

With a combination of complex yet accessible chords where modulations go by with discretion, we find a record where imposing strong melodies are mixed with sophisticated jazz arrangements.

Here's how one could sum up *Patrick McCarthy*'s style: A mixture of skillfully crafted original songs inspired by the essence of timeless classics reinvented with a fresh new approach, embedded with the artist's distinctive style tagged as **#sophisticatedpop**.

Marking the new generation of crooners, the classically trained singer-songwriter has performed over 1200 shows across the world and one would argue that he was way overdue for his first record.

Why did he wait so long? *"I always wanted to travel the world, discover new countries and have a great life. Having achieved and fulfilled that dream I am now more focused on legacy. My new goal is to try to impact the world in a good way with my songs, knowledge and passion so the next step was clearly to put out a record that conveys my passion & values. And to be honest it is a little scary, but yet so exiting."*

Having written countless songs for many artists he is now currently finishing a first EP with famed producer **Guy Tourville** and top musicians including **Kaven Girouard** (Celine Dion), **Philippe Turcotte** (Marc Dupré) & **Sam Harrison** (Steve Hill) to name a few.

Back from a 5 week tour in Greece the singer-songwriter is presently polishing is debut EP before it's soon release and like **Frank Sinatra** said "The best is yet to come".
